

Brass, Chrome, Aluminium, and Stainless Steel fittings

We recommend,

Clean all chrome surfaces immediately after use to stop a build-up of dirt and harmful limescale on your product.

Clean with a warm weak neutral washing up solution, rinse immediately with clean water and dry with a clean soft cloth.

The occasional use of a mild non abrasive bathroom limescale remover can be used, ensure to rinse off immediately with plenty of clean cold water. To remove a build-up of lime scale, we recommend to use a white vinegar solution.

Please do not...

Do not use products that contain abrasive chemicals to clean your brassware. This may cause the materials to corrode which inevitably will void the warranty on the product. If you would like further advise on the recommended cleaning products to use, please contact our customer service team.

Do not scratch the finish as this can leave your product vulnerable to corrosion.
